

THUS SAITH THE MOST HIGH!

3652 ""There are none so damned as those who will not hear the Voice of Righteousness.

3653 ""Therefore, I have given Testimony Irrefutable unto every soul that they know My Voice of Righteousness among them, and avoid all Evil.

3654 ""Therefore, have I required every soul to know My Voice of Righteousness, even those whom I have taught out of My Own Mouth.""

CHAPTER TWENTY-EIGHT HOLOCAUST!

3655 This Chapter 28, 29, and 30 following set the perspective for both the coming Legislated Enslavement, Holocaust and Tribulations that are now totally unavoidable and establish the reasons for an immediate change in our priorities to be about the preparations necessary to survive the horrendous days ahead. We have coined some words that may or may not come into common usage, ThermoFlash, ThermoBurst, ThermoBlast, Thermo-Winter, Thermo-Summer, Thermo-Spring, Thermo-Night, Thermo-Snice and Thermo-Drought being among the more notables. Air Shock and Ground Shock have been around for some time, but not in the tense and intent we use them in this book.

3656 These three chapters are all too short, especially with respect to technical information as advances are always being made available, but do establish a general outline of the processes and their requirements.

3657 Nothing can be done effectively halfcocked and on the spur of the moment. Success takes time, organization, planning, resources and management, all being of equal importance. Time is one factor of which we're extremely short, followed immediately by resources. The organization is in place, but many of the offices are vacant for lack of dedicated personnel who are also qualified. Most of the oversight plans are completed, but there is still a great deal of modification, or is adaptation a better word, to be implemented as each Commandry is in a different logistical and geographic situation, as are each of the selected Refuge sites.

3658 There is no one shoe to fit all feet. The years of squandering resources on 'self-important' jackass plans and schemes, in direct violation of standing orders, will take its eventual toll with appropriate and eternal consequences upon the perpetrators. However, that does not help the immediate situation.

3659 Once you have a better grasp of what the situation really is, and where we stand on those issues with respect to resistance, escape and survival, you will be far better prepared when you attempt The Great Testimony as instructed in Chapter 42 following.

3660 These three Chapters, 28, 29 and 30, are the foundation blocks of perspective for the entire Promised Elect Remnant in Refuge! Either you understand the contents of these three chapters, or you are missing the most immediate intent of this book. There are other signposts along the literary way in these pages, some in humorous form as with the fictional Petronius and Justinian, but the basis of the situation as it applies in this day and age is right here.

3661 (1980) Despite the fact we've been programmed for years to believe the Russians are going to be the villains in our thermonuclear demise – which they would if given sufficient edge in weapons capability as those god-damned, traitorous and stupid liberals, primarily Rhodes Scholars, want in their gutlessness – the greater danger of the Big Boom is not from any foreign country as they exist today, but rather as they will exist after the establishment of the New World Order being primarily western nations spoken of by ex-President and Super-Traitor James Earl Carter; belovedly known to Rockefeller, Bilderberger and/or other traitors alike as the One World Government!

3662 We'll cover this Supreme Act of High Treason eventually, but let us put our first concerns first; namely, the Holocaust and its horrendous aftereffects and exactly what the 'survivors' will be up against.

3663 To do this, we, The Akurians, have reproduced herein the content of some of our manuscripts, some dating back as far as 1962 (GCAD); containing terms and information only recently being revealed to the general public! However, make no mistake: the Holocaust will not come from Russia or any other foreign state unless we drop our defenses to the nitwit point desired by those communists in disguise who advocate every halfcocked delusion that serves only to weaken our national defenses in the world, destroy our national economy, and eliminate our personal defenses in our homes and on our streets, some of whom we have elected to the very offices responsible for that national and personal defense!

3664 The Big Boom will not be a singular blowout and should not be confused with a meltdown in some under-maintained and incompetently-manned nuclear reactor as we damned near did at Three Mile Island, despite continued warnings by The Anointed Witness of This Generation that such was inevitable unless corrections were made in

damned short order! (Chernobyl, which means wormwood, April 26th, 1986, is the latest prime example!)

3665 The Big Boom will be multi-warhead strikes upon major metropolitan areas, and each and every military installation is a prime target, including Naval fleets-at-sea who resist the executive order to both surrender to and enforce the dictates of that One World Government! Any series of thermonuclear detonations, regardless of country of origin and regardless of country of target, will be a global disaster with consequences that cannot be reversed and horrors that cannot be adequately described.

3666 The Big Boom will create both a Thermo-Winter and Thermo-Summer and ages of lingering aftereffects. And the One World Government bastards – thinking themselves to be both prepared and legally immune of their crimes – are sparing no effort your tax money can afford to bring all of it down on you and your generations after you.

3667 To understand the horrors of both Thermo-Winter and Thermo-Summer, a bit of weather related information is required to better understand the ramifications of all that fine debris that will be floating around in the atmosphere.

3668 In the normal process of water evaporation and precipitation, specks of dirt are needed for rain droplets and snowflakes to form around! While dry air and ambient temperature are two elements contributing to water evaporation, light photons from the sun are equally as critical! Then the normal process of wind and heat raise both dust and vapor into the atmosphere. Without the dust – or some such particle – and water vapor we wouldn't have the rain and snow so critical to fresh water supplies and all surface life on this planet.

3669 And here is the danger in our modern world: those particles can be virtually anything including automotive and industrial emissions that also cause global warming. However, some chemical emission particles are so small, they hold water and act like miniature mirrors, causing clouds to reflect sunlight which in turn limits the amount of sunlight reaching the ground, already a serious problem around the world. Because those particles are so small it takes longer for enough of them to bond together to permit rainfall, and the temperature differences create enormous changes in weather patterns already seen all over the globe. That delay and changed weather patterns will be a Death Warrant for all surface life following the Big Boom if our current emission and industrial pollution doesn't exterminate us first.

3670 Currently we're ignoring the weather changes and end results of those two factors – global warming and dimming – by not fully understanding the true ways of nature. Our 'leaders' do not give a damn as long as their manipulation of both massive storm disasters and years-long famines produce the expected profits for the Kak Jews and other One World Government bastards to ensure their economic stranglehold toward TOTAL Global Enslavement. These manmade ecological disasters are just one more factor being used to legislate more socialist damnations upon the whole world. Were this not true, then there would be a no holds barred global effort to eliminate both greenhouse gasses and industrial emissions! But such an effort would cost money, and the Kak Jews can't have that!

3671 With that in mind, let us explain the disaster.

3672 (1962) Any thermonuclear detonation is a monster of the first magnitude, even underground tests, but an Air Burst programmed to blow at optimum altitude over a given target zone is a hell of the purest imagination this side of The Great Judgment!

3673 First, out of the detonation comes ThermoFlash, a searing-hot blinding light of such intensity the instant you see it you are burned if you are within near miles of a Ground Zero! The greater the thermo-device's yield, the greater ThermoFlash's burn area. In close proximity, humans, buildings, trees, grass, roofing, insulation, paint, birds and all wildlife, glass, fuels, oils, lubricants, combustibles, industrial chemicals and raw materials, including water, are instantly vaporized! All this debris, whether turned into radioactive ash or radioactive gaseous particles, will be lifted into the atmosphere – first, by force of the blast; second, by differences in atmospheric pressure; and third, by the resulting firestorms and weather changes.

3674 The two primary considerations are: all this fine dust and debris will be in the atmosphere and it will already be radioactive, containing all the energy it will need to do its worst upon the whole world.

3675 Farther out, ThermoFlash will ignite fires all over the landscape, making excellent primers for additional ignitions in the next phase: Air Shock, which is already on its rampage! Initially moving faster than sound, some eleven hundred (1,100) feet per second at sea level, depending on atmospheric conditions, Air Shock is the result of expansion from tremendous heat – not only the device's fuels, but also ambient water, vapor, chemicals and the target area's very atmosphere! Air Shock, like ThermoFlash is hot enough to ignite virtually everything it touches close to Ground Zero, but also violent enough to tear down everything within miles and to lift millions of tons of dirt and radioactive debris into the upper reaches of earth's atmosphere!

3676 While the expansion rate of water directly into air is about seventeen hundred (1,700) to one (1); providing an unimaginable wallop to Air Shock's destruction, it is the chemicals – fuels, lubricants, refrigerants, solvents, detergents, and catalysts – used for industrial purposes and processes in general commerce, heating and cooling private homes, apartments and condominiums that will deliver many more deaths and sufferings during years-long eras of

aftereffects!

3677 Even so, Air Shock will introduce countless fires, both in the immediate target areas and in surrounding forests and grasslands for miles in all directions as it scatters flaming kindling of virtually every combustible on its billowing wave of super-hot destruction!

3678 And the worst is just beginning! Next in event, and hard on the heels of Air Shock is:

3679 Ground Shock! An earthquake-dimension tremor that shakes reinforced concrete and steel buildings to expensive rubble and tears down virtually every structure left standing by Air Shock; uprooting utilities, water and sewer mains; breaking electric power and telecommunications lines; collapsing bridges, subways, streets and highways! As gravity and vacuum laws begin to make their forces felt, Ground Shock will still be outbound as Air Shock begins to reverse making the upper stories of a building stress inbound by Air Shock while its foundation is being pushed outbound by Ground Shock! This swinging back and forth not only happens at high rates of speed, but as it settles there will be fires that suck in oxygen at and beyond hurricane force winds!

3680 Without electrical power, communications and telephones (that are land lines from the receiving tower to the uplink), or water supplies to fight countless fires, with streets, subways and roads made impassable by tons of debris and fallen bridges, rescue will be impossible! Surviving fire, police, civil defense and other government agencies will be as useless to the general populace as tits on a tadpole! Those 'government' personnel who can, will be enroute to their own families or in flight for their very lives!

3681 Those who are armed, government, police, criminal, or otherwise, will have no qualms about using that firepower to their own ends against anyone else, and especially the unarmed! If nigger elements of both Black and White races will loot, rape, murder, and riot at a mere local power outage, do you suppose those same degenerate mentalities will suddenly become merciful pillars of the community given this opportunity? Only a totally mentally incompetent fool would think so, regardless of the 'liberal' cum socialist opinion!

3682 Remaining food, water, medical supplies and facilities will be priceless, as will firearms, ammunition, radio transceivers, batteries, fuel, blankets, clothing, lanterns, candles, axes, saws, towing rigs and chains, and all other tools, including support and maintenance items as files and sharpening stones, but not necessarily in that order! What will be left of governments will attempt to secure as much such logistics and supplies as possible by declaring Martial Law to expend as slave labor wages! They'll be going head to head with criminal elements and those just trying to stay alive! Once in government hands, rest assured: only the dutifully obedient to the Great Enslaver will be provided even the scraps thereof!

3683 Nevertheless, we haven't given you the worst yet!

3684 Every first-year grade school dropout mechanic knows that in diesel physics, anything subjected to sufficient heat and pressure will combust! That includes nuclear electric generating plants, fuel enrichment facilities, nuclear waste storage areas and even some nuclear research reactors! That's right! Those nuclear power plants, nuclear fuel processing and fuel enrichment facilities, nuclear waste storage areas, nuclear research reactors and even nuclear supplies at research cyclotrons, in close proximity to Ground Zero, will blow like a string of firecrackers! And so will thermonuclear warheads stockpiled at military installations! It's a matter of sufficient pressure to generate the heat required. Whether a detonation by some psychopath or a meltdown from lack of service will matter little to the victims.

3685 And all that dirt and concrete shielding the nay-sayers will brag about will not be worth a diddler's damn; and they all damned well know it.

3686 The amount of fissionable material in even fifty (50) and one hundred (100) megaton devices is nothing when compared to hundreds of tons stored in these ground based plants and installations, especially power generating plants! And if detonated, being at or below ground surface will pour many more millions of tons of radioactive dirt and debris into the ecosystem and cause far more massive Air and Ground Shocks at detonation!

3687 Quantity will more than make up for quality!

3688 Debris from the planned ThermoBursts will be bad enough, having far more and worse aftereffects than presently (1962) being revealed; but a Big Boom of this magnitude at just one metro-area will be a tremendously greater disaster than anyone except Akurians expect or are planning for!

3689 Even the 15-20 kiloton blows at Hiroshima and Nagasaki had global effects, even if our 'scientists' and 'leaders' either didn't know or wouldn't tell us! But this age of multi-megaton devices and multiple warhead delivery systems, things are one hell of a lot worse than anyone except Akurians are revealing!

3690 It is those aftereffects and near-permanent damages we are going to cover for all who haven't already thrown this book away to prevent massive nightmares and other weak-kneed namby-pamby conditions.

3691 (1962 continued.) As ground-based facilities erupt with far greater force than their initial ignition warhead, the

same process – ThermoFlash then Air Shock followed by Ground Shock will take place in the same order, but probably confused with, and certainly intermingled with, the initial thermonuclear detonation Air Burst. In fact, the time delay will be about the same as an artillery warhead's explosion in a fuel tank and that tank's fuel's ignition. Microseconds at best!

3692 Helping to ensure the diesel physics combustion in these facilities will be a tremendous electro-magnetic wave (EMW or EMP, that will help to provide a great deal of the required heat) or force field, created at ThermoBurst, and capable of overloading and burning out electrical substation transformers, communications, computer circuitry and even erasing data bank memories, with countless ground-level Lightning bursts charging everything, especially radio-carbons and then repelling them into the upper reaches of the atmosphere! All current is negative in motion and alike charges repel! The problem with charged carbons being repelled upwards is: carbon absorbs radioactivity like a sponge!

3693 A future horror is the fact: radioactivity, even in very small amounts causes carbons to chemically combine with every other compatible substance! The half-life, the time for radiation to decay by one-half its strength, can be ages depending on the isotope! Carbon-14 used in age-dating has a half-life of five thousand, two hundred eighty (5,280) years in its pure form (thus the errors in Carbon-Dating)! There will be countless formulae of carbons in the Big Boom, so all those government-funded 'two- or three-week' survival plans are blatant death traps conceived and manned by suicidal fools!

3694 None of the government 'refuges' are "two- or three-week" installations; they're provisioned and equipped for MONTHS on end! In fact, there are no 'government-funded' facilities or provisions for the general populace, regardless of what we're being told and taxed to death for! There are only facilities for the traitorous bastards in government who are responsible for this Global High Treason of Crimes Against Humanity and the Whole World! And FEMA damned well knows it, but they are immune behind the firepower of the same corrupt bastards they're using your money to make all the preparations for!

3695 Though most of this radioactivity will fall back to earth in dust storms and precipitation, a lot of it has a far worse effect than some long-term, ground-based contamination! What ThermoBlast and its EMW (or EMP for electro magnetic pulse) haven't destroyed or burned cut will be in for one hell of an ordeal, not excluding radioactive fallout, by any stretch of the imagination!

3696 First, immediately following ThermoBlast by not more than a few hours, is Thermo-Night! A severe darkening eventually encompassing all global hemispheres as countless tons of dirt, debris and smoke are either lifted or blown into the high reaches of the atmosphere. It will initially change the color of both the sun and moon and very quickly prevent their light altogether! As result of this Thermo-Night's shadowing, the entire earth's surface will begin to cool! And we don't mean down to the point where it will be a good place to keep beer either! We're talking about cooling so severe we call it: Thermo-Winter! And it will last so long that normal past winters will be remembered as whiffs of a passing ice cube!

3697 Once established, Thermo-Winter will not be anything like the beautiful songs "White Christmas" or "Winter Wonderland" but a raging terror of hurricane-force blizzards with huge white tornadoes throwing hail and ice chips at magnum-bullet ballistics! Not only will Thermo-Winter freeze everything in its path, it will bury everything under a cover of radioactive snow and ice which we have dubbed: Thermo-Snice!

3698 Now, all this Thermo-Snice will have its own effect on things. Each and every raindrop, hailstone and snowflake initially forms around a speck of dust which it brings to earth as it falls! True, it will take perhaps years for this Thermo-Snice to precipitate sufficiently to clear the skies, and when it does:

3699 'Preachers' and other liars and their still-ignorant fools will 'praise Jesus', again! 'Thermo-Christians' will swear and be damned the first ray of light is 'the Second Coming', again! Hallelujah halfwits and other such idiots will raise no small amount of hell, thinking their enslavement is about over! What neither they, nor their god-damned 'teachers', 'leaders', 'instructors', 'preachers' and other liars know is: those rays of light not only signal the ending of Thermo-Winter; it also signals the beginning of Thermo-Summer! And a myriad of other horrors in its wake, because Thermo-Spring will be damned short!

3700 What has been happening all that time is this: at ThermoBlast countless tons of carbons were radioactivated as they became vaporized or ashed in those extremely hot fireballs. Many chemicals we take for granted are actually carbon based or contain carbon in some form. Even common Freon 12 and 22 used in air conditioning and refrigeration (which will be outlawed in the United States and shipped in even greater quantities to the so-called 'third-world' countries as well as aerosols of all descriptions) is one. Carbon TetraChloride used in dry-cleaning is another; PercChlorEthylene, an industrial solvent cleaner is yet another! And there are many more that become either Hydro-, Petro-, or Fluorocarbons upon evaporation vaporization if they aren't already! Common window glass, paint,

insulation, sealants, mastics (glues), wood, grass, tires, plastics, coal, charcoal, and all other such materials are carbon based, if not nearly pure! That all such materials in close proximity to Ground Zero will be vaporized, and radioactivated in the process, by the uncounted tons is but the beginning of the horrors to come as a direct result.

3701 Instead of these carbons raising into the atmosphere over two or three years to reach high enough to become radioactive from solar or cosmic radiation where they are then capable of chemically combining with the oxygen of the ozone layer, they will reach these high altitudes in a matter of minutes, already flaming hot with radioactivity! And their own brand of hell is awaiting Thermo-Summer which they have already made irreversible and inescapable anywhere on the planet!

3702 As global temperatures rise from continual clearing by Thermo-Snice, there will be earth changes that will not fit the mold of most 'doomsayers' or 'preachers' and other liars, and none of the 'survivalists'! Thermo-Summer will not only bring relief from constant freezing, it will melt the Thermo-Snice cover, glaciers and perma-ice, and both polar ice caps! And that only begins this new set of horrors!

3703 Those radioactive carbons, elements and other chemicals will have already chemically combined with the oxygen of the ozone layer – a very thin but vital layer of high altitude oxygen that filters out incoming light and cosmic radiation! There is so little oxygen in the ozone layer that at sea level pressures it would only be about an eighth of an inch thick! But without that small amount of oxygen, all life on the surface of this planet would be impossible! And we're damned near to that point when Thermo-Winter rains and snows itself out into Thermo-Summer.

3704 Sunburns and countless skin cancers will be the reward of permitting the socialists to enact Legislated Enslavements, the Holocaust, and all the High Treasons leading up to it! Super-hurricanes and their many tornadoes, Thermo-Snice and other melts will flood all coastal areas, covering many radioactive craters where major port cities used to be! The best current guesstimate is a rise of somewhere between 200 and 400 feet of water at all coastal areas.

3705 As those incoming radiations, especially ultraviolet light, begin to take their human and surviving wildlife toll, the temperature will continue to rise! Hurricanes and other storms will have all the heat they need to run rampant until there is insufficient atmospheric dust left to begin precipitation formation, permitting the cleared skies to raise temperatures to the point that cloud formation is no longer possible. Without any cloud cover or precipitation in any form, Thermo-Summer will be on in such fury as to make Thermo-Winter seem pleasant by comparison. Those crops in the field once destroyed by Thermo-Winter's big freeze will now be burned without mercy in Thermo-Summer's merciless heat, creating Thermo-Drought on a global scale!

3706 For your information: A depleted ozone layer being created during Thermo-Winter will bring a Thermo-Summer that "Hell Itself" is too mild a term to compare. The duration of Thermo-Winter will depend on the number of warheads and ground facilities detonated, chemical and carbon resources at Ground Zeroes, and the number of target zones destroyed. Seven to ten years is the best guesstimate with no guarantees either direction. Thermo-Summer on the other hand is a bit more predictable: lasting about forty years!

3707 However, there is eventual hope!

3708 Following Thermo-Summer there will be another forty years of thermo-cleansing!

3709 With such vast amounts of heat, water vapor will at some point saturate the atmosphere, initially restoring the condition recorded in the Bible of the whole world being watered by a mist and effecting enough cooling to again cause rain, if there were enough dust, pollen, sea salt, ash, chemical contamination particles, et cetera, for the moisture to form around. Don't worry, the Global Socialists will not leave the world in such an empty-handed state. Another attempt at world domination will again blast enough dirt and fine debris into the atmosphere to permit both cloud formation and precipitation.

3710 What the socialists don't supply, The Most High promised an earth-axis shift in addition to its volcano eruptions; and thus there will be plenty of dirt and dust in the atmosphere for all the precipitation required to thermo-clean the planet and justifiably cause the final fall of that coming vile, corrupt and degenerate New World Order of One World Government headed up by That Great Harlot of Babylon at Roma: the Roman Catholic Church and every remaining Kak Jew whose debts to the Catholic Church couldn't be cancelled!

3711 But back to the immediate future.

3712 In the horrendous days immediately following the Big Boom, there will be no such thing as 'rescue' by our present fire, police, and rescue agencies. They will not be able to move equipment in the first place, and there will not be any utilities, water, or anything else to rescue with! Even if the populace had any reliable telecommunications with which to ask for rescue! Those emergency generators will keep the hospitals, fire, police and rescue communications operating until they run out of fuel, but that doesn't help the citizen who is miles away hanging on a telephone that no longer works!

3713 Food, when available at all, will eventually be that of unburied corpses, which if not eaten will rot and spread all manner of diseases and plagues! Once all available cadavers are consumed, radioactivity and all, the weak, sick, and helpless will become fare for those still able to kill instead of being killed! One's own dung and urine will be favored over just about anything else under the deluded assumption it isn't contaminated with radioactivity!

3714 Shelter in any form will be the place of the damned, as Thermo-Winter will be a howling hell on the surface and Thermo-Snice will be melting radioactive dirty water on the bottom! Even so, life will go on. Especially by those traitorous bastards in those 'government-funded' shelters who will force anyone they can get to do their dirty work! Remember, those same traitorous bastards will have all the secure food, clean water, medical and other supplies! And they will have all the secure fuel and equipment to transport those who will enforce their dictates, and untold scads of arms and firepower to ensure success! The citizens will be disarmed en masse' under an ever-encroaching series of Legislated Enslavement statutes and court precedents under the treasonous disguises of 'crime preventatives'.

3715 [INSERT: Such as the current wave of emotional stupidity instigated by the government blowing up the Alfred P. Murrah building in Oklahoma City, on June 19th, 1995, and known throughout the world as The American Reichstag! The seismograph chart shows TWO explosions! Ten seconds apart! One 'truck bomb' can't do that and the building collapse can't be that strong unless someone dropped the whole building from about one thousand (1,000) feet!

3716 People who are programmed stupid 'believe' everything 'the government' does or says is the absolute ultimate in honesty and righteousness, and are surrendering their liberties to reputedly have a bit more security! All but the most cowardly and blatantly stupid know for a fact: those who surrender freedom for security will have neither!]

3717 Woe to the 'survivors' of the Big Boom, for the Enslaver awaits for all able bodies; he needs slaves by the millions!

3718 For what?

3719 To complete the Grand Plan of TOTAL Global Enslavement!

3720 You don't think those god-damned, traitorous, One Worlders have a short memory, or lack dedication, do you? Certainly not that god-damned, Kak Jew financed, pagan Great Harlot of Babylon at Rome, the Roman Catholic Church, whose combined crimes make Hitler, Lenin and Stalin put together look like a matched set of Holy Presence Saints by comparison?!

3721 We'll cover those atrocities in more detail in later volumes, but now to the immediacies.

3722 After the Big Boom when most of our major cities and military installations are little more than huge radioactive craters, those with the brains, courage, and firepower to act will begin to secure whatever supplies and logistics are available and attempt to move them to some sort of defensive position. Anything less is blatant suicide!

3723 Containers for fuel and water will be at a premium, as will guns and ammunition. Those who will attempt to locate families only a few miles distant will be expending vital time and energy on a pursuit of nonsense.

3724 Employees at work stations;

3725 Children at school;

3726 Patients in hospitals;

3727 Inmates in jails, prisons and mental institutions; and

3728 Congregations at 'church' will be trapped in those locations and abandoned by all those charged with their safety and care! Anyone who can get away to the boondocks will do so without delay, taking only what they can think of in their mentally shocked state of mind! True, those chosen few who happen to be in close proximity to family members and are far enough away from Ground Zeroes have the best chance of reuniting and organizing their families and a few neighbors!

3729 [INSERT: All the 'resistance' to home education and forced bussing to achieve a racial balance has nothing to do with 'equality' or any other such hypocrisy! It is to ensure that the surviving victims are as mongrelized and mentally burdened as possible, worrying about their families who will, in all probability, be several miles away! If you knew the whereabouts and condition of your family, then you can clearly concentrate on your defense against this god-damned government! And this god-damned government doesn't want that.

3730 And the initial reason for 'bussing to achieve a racial balance' is to destroy the family as a unit by first eliminating the parent's ability to control, or even influence, the conduct of schools by also destroying the parent-teacher association! It's a very simple process: simply hold all PTA meetings at the same time, and a parent with children in two or three schools can only attend one! Thus 'neglecting' the others! In fact, 'bussing to achieve a racial

balance' applies only to Black children and not to Jews, Native Americans, Orientals, et cetera, so the blatant hypocrisy thereof is obvious to anyone with more brains than a retarded oyster!

3731 And isn't it a miracle of miracles to see the success of all this socialist educational crap!? Ask anyone with gray hair how many police officers they needed in the classroom when THEY went to school! But we damned sure need them now, and armed to the teeth. Can you figure out why? Would it be the CRIME brought into the schools by those same 'bussed in and racially balanced' students? You're damned right it is!

3732 However, forced open housing, forced bussing, and forced integration, against the will and wishes of the Black Community as well as White, Orientals, Native Americans and Jewish communities, are but one tentacle of the multi-massive stranglehold of the One World Government's scenario of social engineering toward the Grand Plan of TOTAL Global Enslavement.

3733 The destruction of the family unit is another, and the bastards are winning that one across the board. They'll continue to win until the citizens ARM THEMSELVES and set their own rules for themselves and the CONDUCT of their children. Firepower WORKS! Nothing else produces more than a popcorn fart in a hurricane.]

3734 Airborne fallout will seem to be the prime concern, and it is the most immediate. But long-range preparations are then impossible and that Thermo-Winter isn't going to be a passing fancy! Most manuals suggest two or three feet of dirt covering to shelter initial fallout. That might be all right for hallways and access routes that are used infrequently in moving from room to room. But fourteen feet of hard-packed dirt is the bare minimum over anyplace occupied for an extended stay, including exterior walls! Weighing approximately one ton per cubic yard means each and every square foot of overhead area will have over one thousand (1,000) pounds to support! At or near load-bearing walls and close partitions that may not be much of a problem, but out in the middle of a room that much weight is unthinkable!

3735 Those people who choose, or are economically forced, to live in townhouses or multi-storied apartment complexes are wasting their time! Even most berm homes will not support the weight of sufficient soil covering. An average nine (9') by twelve (12') room needs one hundred twelve thousand (112,000) pounds or fifty-six (56) tons of covering soil; and that's just for the roof over that one room! Walls and windows have to be sand-bagged to that same fourteen-foot thickness, doors and exit chambers have to be multiple-baffled and multiple-draped just to limit infiltration of airborne contamination. And that in addition to some sort of floor-matting to deter foot-borne contamination.

3736 Then there's the matter of filtered air, for breathing! Not only does that require an airtight enclosure so only filtered air is permitted to enter or leave; that air has to be radiation filtered! Filtered of all radiation dust just like the stuff that covers everything every few days! Once the contamination is inside, it doesn't matter how it got there; the occupants are as good as dead. It's just going to take a long tour of agony to die.

3737 With all this, the occupants still have to breathe and maintain some degree of temperature compatible with life. They also have to maintain constant alert against looters and others attempting to survive, some of whom will have become cannibals! They also have to dispose of waste; secure food and water supplies; and pray for the day they can strangle all the politicians, supremacists, socialists, communists, fascists, marxists, liberals, false prophets, phony psychics, preachers and other liars who brought these damnable horrors down on them that they should have slain before all these atrocities. Specifically 'preachers' and other liars claiming the 'rapture' or "the Second Coming of 'Jesus' before . . .", and 'politicians' entrusted with our national security even against traitorous manipulators like David Rockefeller and all his 'commissions' and 'councils', the Bilderbergers and all other One Worlders, not to exclude either That Great Harlot of Babylon at Rome: the Roman Catholic Church, or the money-and-power-grubbers of the House of Levi and the House of Judah!

3738 If you happen to be one of those in a group with sufficient firepower and trained personnel to maintain around-the-clock security for months on end; hunting trips and foraging excursions in sufficient strength to ensure return; adequate field equipment, parts, supplies and fuels; you just might live until the Enslaver comes for you in force!

3739 The Enslaver, commonly known as government to those who 'survived' thusfar, will have need of many bodies, yours among them! The Grand Plan of TOTAL Global Enslavement will be as alive as ever, but even more hell bent on victory! Your logistics and preparations are a delay and expenditure of manpower and materials that are less and less affordable and less and less tolerable to the Enslaver!

3740 So, let us take a look at some 'prior rescue' and 'survival plans' and see just how damnably stupid, ignorant, and dangerous they really are!

3741 First, and most preferred, is "the Second Coming of 'Jesus' before . . ." as bellowed loud and long with extreme bawling all over the landscape by those god-damned hallelujah halfwit 'ministers', 'preachers' and other liars!

3742 If any of those demonic pagans outrank the Messiah whom they supposedly serve; and:
3743 If any of them have irrefutable proof of their 'divine calling' (which ONLY the Holy Anointed Witness of This Generation of Fire does!); and:
3744 If any of them can overrule God Himself!:
3745 Then perhaps they should be given some small consideration for their blatant Blasphemies: false demonic doctrines and calling both God and their Messiah bold-faced liars!
3746 Immanuel [YOU-HOSH-YOU-AH (Joshua) ben (son of, from) YOU-SEFF (Joseph) ben NAZ-ZAR-RAH-TEE (Nazareth)] whom the Babylonian pagans at Rome and all their Babylonian harlot fallout 'christian' daughters call 'Jesus', clearly and plainly said (Aramaic translation, emphasis ours!):
3747 Matthew 24:29-30; "Immediately after the Tribulations (troubles!) of those days the sun will be darkened and the moon will not give its light and the stars (elements!) will fall from the sky (not 'heaven') and the powers of the universe will be shaken! (continuing with verse 30) and then (not 'before!') the Sign of the Son of Man will appear in the sky; and all the generations of earth will mourn, and they will see the Son of Man coming on the clouds of the sky with power and great glory!"
3748 And: Matthew 24:36; "but concerning that day and hour, no man knows, not even the Angels of Heaven, but The Father alone!"
3749 Since it is Immanuel's coming: he should at least know the sequence of events (since he spelled them out in earlier portions of this same Matthew 24!) if not the exact day and hour! The sequence with after all duly included is confirmed in Mark 13, with the sequence again in Luke 21, and The Holy Scripts of All The Heavens and All The Earths show the same thing!
3750 However don't confuse the Big Boom with the Second Coming! They are two entirely separate events several years apart!
3751 If Immanuel said "after", which he did, then just where in all paganistic hell did these god-damned 'priests', 'ministers', 'preachers' and other liars get "before"!?
3752 They have to be god-damned, Blaspheming, blatant liars of the first magnitude!
3753 And anyone who 'believes', follows or supports them has to be so god-damned demon-possessed they can't even read the very scriptures from which those lying bastards supposedly get their information and doctrines! Even so, The Most High Lord God of All Creation did promise an Elect Remnant and to intervene on their behalf in That Day!
3754 And it's a sure and certain fact the Elect Remnant is not numbered among the 'christians' nor found listening to, nor supporting false, paganistic doctrines; specifically, 'Jesus' before . . .', and the 'rapture'! Neither are they going to be found out in the boondocks with a bunch of half-baked, unprepared, ill-equipped, jackass 'survivalists'! They may not be much, but they're smarter than that!
3755 "But we have an abandoned mine . . ."
3756 That's nice. You can die as dead there as in the Radioactive Rapture!
3757 "But it has tons and tons of coal for fuel . . ."
3758 "It's way down deep underground . . ."
3759 "It has water flows and natural gas . . ."
3760 "We've put in electric generators . . ."
3761 "And television cameras to watch outside . . ."
3762 "And lots and lots of food . . ."
3763 That's nice too.
3764 However, in order to dig very much coal you are going to have to have something to keep the new headings from caving in! At one time miners used ordinary logs and posts (timbering), and for the last few decades they literally bolt (pin timbering) the roof to itself with a big drilling (a huge powered-screwdriver) machine with metal bolts, expansion nuts and washer plates. Do you have an eternal supply of trees, or this equipment and materials? The corner mine supply company selling to all dumb-asses will not be open!
3765 And you are going to have to produce one hell of a lot of power just to ventilate for breathing, let alone fumes from those generators! You'll have to start with all that natural gas that seeps through coal mine cracks everywhere and explodes with the slightest spark, leaving the place filled with deadly carbon monoxide!
3766 Incidentally, coal dust is as deadly explosive and fire hazard as wheat dust and dynamite! And of course, your Fire Department is fully equipped and prepared to fight coal fires deep underground. However, coal dust is as sharp as diamond, and when breathed in clogs and cuts the lungs. It's called silicosis. Also known as Black Lung disease. It's deadly, irreversible, and can only be prevented – not cured.

3767 There is no such thing as a fresh-water spring inside a coal mine, all that sulphur-contaminated water will just have to be delicious!

3768 The television cameras and monitors are a good idea! Did you also install a few VCRs with plenty of tape, canned movies, or perhaps rig exterior antennae or cable systems? Or didn't all that extra expense of timbers (or are you modern enough to use pin-timbering?) to prevent cave-ins, and bolts of brattice cloth and nails to hang it with for ventilation, leave enough money? We hope so; the Enslaver loves color television, color computer monitors and matched equipment.

3769 And he loves all that nice food too! Did you can or dry it yourself?

3770 The shelf-life of even 'survival' food is only about two or three years! That's right, or didn't you know commercially packaged foods, like virtually everything else, has its own planned obsolescence: called spoilage! The Enslaver doesn't like spoiled food, even when he steals it!

3771 "But we have guns, and lots of ammunition . . ."

3772 You are going to need it. Every solitary round! Not for defense, but for suicide!

3773 If you were alive then and had the intelligence to pay attention, you'd be aware of the fall of Dien Bien Phu, North Vietnam, May 8th, 1954; when the Vietminh beat hell out of the French at what was hailed as the "strongest military fort" in recorded history!

3774 It may very well have been! It was certainly heavily manned, armed with French regulars and Foreign Legion, stockpiled to the hilt, laced with artillery and anti-aircraft pieces, and could be re-supplied by air-drop!

3775 Or so they said.

3776 Then what in the hell happened?

3777 The Vietminh ate what few horses they had, abandoned the wagons, and didn't have the powder and lead to blow themselves to hell!

3778 Repeat! What in the hell happened?

3779 True, the Vietminh didn't have much but determination, a few shovels, more manpower, and enough of the most efficient killing weapon: mortars! And a very simple strategy.

3780 After learning in Korea that throwing bodies against deadly machine guns is not the way to fight a war, they surrounded Dien Bien Phu. Then they snipered without letup. Dead and injured began to pile up. They mortared to keep French heads down during Vietminh troop movements. And they dug! They tunneled each outpost in turn! With constant shelling the French couldn't receive supplies, nor could they remove their dead, or do much for their injured! Dead bodies rot. And they draw rats. And rats spread disease like a wildfire! And when you can't bury the dead without being shot, the dead remain unburied and draw all those disease-carrying rats.

3781 Dien Bien Phu was a real nice place to be, don't you think?

3782 And still the Vietminh tunneled, coming up behind each outpost in a dozen different places! Shelling and shooting each into surrender! Without help, or resupply, each outpost gave up in turn until the whole damned fort had fallen.

3783 Just like that god-damned mine will!

3784 There's simply no place on this, or any other continent where the Enslaver can't bring continuous miners, complete with pin timbering, and dig you out! If he chooses. He doesn't have to breach your tunnels; he only has to 'sound' for them, drill the proper holes to place explosives, and blow your damned mine to a massive cave-in! You will either come out or be buried inside!

3785 And don't even attempt that line about having guns and tons of ammunition. One solitary squad can keep you holed up inside your damned mine till hell freezes over. And that's the death knell for that nitwit 'survival plan'!

3786 "We're going up on a mountain top . . ."

3787 Big deal. I hope it has fourteen feet of dirt over it.

3788 "But it has caves . . ."

3789 The Enslaver doesn't give a god-damn if it has a gold-plated bunker; it can still be tunneled! And you obviously didn't read the previous death trap!

3790 "How about a missile silo?"

3791 Yeah. How about that? Not only does the government who built the damned thing have an infinitely detailed set of construction plans on file, instead of being tunneled like the other idiots who escaped the radioactive 'rapture', you can be taken with a garden hose!

3792 "A garden hose?"

3793 Yep. Missile silos are built of thick, reinforced concrete. Not only is that nice against exploding shells and bombs, it helps to hold one hell of a lot of water! All the Enslaver need do is dam-you-up and drown-you-out!

Sooner or later your fuel will run out (water is cold); your energy will run out (you can't swim forever); and the pumps will stop because all the water they're pumping out is flowing back in! You've been DAMMED! Remember? DAMMED UP! Then you and all your drowned-rat gathering can surrender just like everybody else who jackasses their preparations!

3794 As for you hale and hearty 'out-in-the-wilderness' buffs, ask yourself just one question: "How long do you think you can 'survive' on radioactive rabbit?!"

3795 If you haven't figured out by now that all these so-called 'prior rescue' and 'survival plans' are nothing more than death traps in disguise, then there's nothing wrong with you that a brand-new set of brains wouldn't cure!

3796 We thought you'd like to know just what Rockefeller, the Bilderbergers, the House of Levi, the House of Judah, That Great Harlot of Babylon at Rome, the Roman Catholic Church, all 'liberals' including Jane Fonda, have planned for you, your friends, and families that's just so wonderful that all these damnable paganistic traitors would go to so much trouble just for us!

3797 And can you imagine how 'sophisticated' and 'intelligent' all those people are who support these traitorous bastards?! It's just so 'superior' of them to remember the fifteen thousand-plus (15,000+) slaughtered American soldiers just from Nixon's election until he finally surrendered to the communists to get re-elected! And all those prisoners of war he abandoned in Cambodia (since we weren't supposed to be there)! And the other Americans missing in action (MIAs), three and one-half million Vietnamese, Cambodians and Laotians murdered by the communists for whom Jane Fonda advocated victory!

3798 And we haven't even mentioned those thousands of Americans who still carry the physical and mental scars of that damnable Rockefeller fiasco!

3799 Sue us! You traitorous bastards: We dare you! You will not, you gutless cocksuckers! You will wait until you can legislate us into criminal elements! But by then only the totally cowardly, programmed stupid, mental and moral degenerates, and those whom The Most High Lord God of All Creation has condemned to the Death of Deaths and Eternal Burning Hell immediately following, will be in your camp. And the rest, however few, will be armed and organized against you!

3800 Back to the present. And let us be clear on this major point:

3801 Our United States military forces on the line have never failed us nor let us down on any battlefield or anywhere else at any time under any conditions! NEVER!

3802 Rockefeller's manipulation of our civilian control over our military notwithstanding! We've exposed the Grand Plan of TOTAL Global Enslavement elsewhere in this volume.

3803 Now for a re-cap:

3804 No prior rescue by 'Jesus' regardless of what the 'preacher' said . . .!

3805 No prior rescue by anybody else either, except The Akurians!

3806 The Big Boom not only destroys target areas at Ground Zero; it destroys the ozone layer with radioactive carbon compounds!

3807 The Big Boom not only devastates cities and military installations; it also detonates ground-based nuclear facilities, nuclear weapons stockpiles, and every combustible stored or stockpiled within close proximity!

3808 Aftereffects include Thermo-Winter followed by Thermo-Summer; both of which are loaded with super-hurricane force storms, radioactive precipitation and fallout with half-lives that can last for thousands of years!

3809 And all of this because the One World Government wants to establish the Grand Plan of TOTAL Global Enslavement!

3810 With sufficient High Treasonous support, the Holocaust is now totally unavoidable! If the socialist bastards can't instigate a nuclear exchange between any other countries – to which we, the United States, must involve ourselves to the point of Martial Law 'in the interest of National Security' – the bastards will use our own nuclear capacity on us. And the plans are far advanced!

3811 And: the big blow down – D-Day – the great deadline for delivery of the United States' sovereignty lock, stock, and cowardly-liberals to the One World Government according to present thinking is scheduled for 05:11 AM, Washington, D.C., Time, Sunday, August 9th, 1999! Hopefully thinking will change sufficiently to delay or avoid such finalities! But make no mistake: The Holy Scripts of All The Heavens and All The Earths clearly reveal at this time (1962, GCAD): that place and that time and that day and that year!

3812 [INSERT: During the early Sixties through the late Eighties this was also the time and date of the Big Boom! But we've managed to buy a little time. Too damned little, but we bought it nevertheless. The mind-thought energies that control our future still don't have That Day nailed down to an exact when, but it's as The Most High said: only He

knows the exact day and hour of the Second Coming, and we suppose the same thing is true of the Big Boom. Even so, that Big Boom is still on the clock! And you can go see it for yourself!]

3813 Any serious effort by The Elect Remnant to discipline themselves into Holy Law for the establishment of their Refuges under the hand of The Anointed Witness of This Generation of Fire can buy some limited time.

3814 The bastards are next.

THUS SAITH THE MOST HIGH!

3815 ""The fool and the follower of fools always wear the countenance of a clown, hoping to impress other fools with their self-important knowledge, programmed ignorance and nonexistent wisdom, while in their solitude they dread and condemn their very existence and hate the truly wise with a vengeance.""
