

FOR HEAVENS' SAKE, WHY HOLY LAW?

It has come up more than once amid some impatient grumbling, toe dragging, wringing buttonholes in your shirt tails, that why do I have to learn Holy Law first? Why does Chylon teach Holy Law before anything else? I want to get to the good stuff! I need my power now!

So here's why. Take these words into your innermost heart, because when you're deep into it, nothing else will work. Not "Jesus," not Mohammed, not Buddha, not Satanic demon worship -- NOTHING! ELSE! WILL WORK!!!

All the Planes of Heaven -- and there are many -- including the Earth Plane and all the Depths, are all subject to the natural laws of physics. Those planes in ascending order are:

Earth Plane: Where energy becomes manifest into solid or physical form.

Etheric Plane: named HATHOR: this is the plane of "Earth Body Double" in spirit form.

Lower Astral Plane: named HASTERAH; identified by a black background.

Higher Astral Plane: named HESTERAH; identified by a white background.

Mental Plane: named IDEAH; identified by a florescent colored background that looks kind of like a camouflage pattern.

Cause & Effect Plane: named HAKARMAH; brighter white background. The Akashic Records, aka the Reflecting Ether is a realm of its own located between IDEAH and HAKARMAH;

The Abstracts: The first plane of which is named HASANNAH! No one goes this high or any higher without special knowledge or an invitation. Period. No one! The Akurians have both -- special knowledge AND an invitation. It will be totally at Chylon's discretion to give you either, the special knowledge or an invitation. Period. She WILL NOT grant either until you have proven yourself worthy, qualified or both. The standard to determine worthy or qualified or both is based on understanding and obedience to Holy Law plus the level of skill that you exhibit and can prove. No exceptions.

So if you're thinking you can just skate over the part about knowing Holy Law and get any kind of power or authority, you've got another think coming. Oorrrrrr, a long-suffering attempt to only end in failure, or at least very limited success with an unbreakable ceiling to stop you. That ceiling is usually the higher astral plane for most folks. HESTERAH.

Here's why: Holy Law is the same throughout all Creation. It is the governing set of GOD-Given RULES that apply the same on every planet, in every solar system, on every plane of Heaven and down into the depths. It is the template for everyone's Judgment at death. In other words, when someone dies, they go in front of Righteous Abel to determine where they will go next. Abel has a scroll that is Holy Law, and when you go in front of him, he compares your life to how well you were obedient to that Holy Law. Your whole life is weighed in the balance against the whole of Holy Law to see how you measure up. And here's a hint: **IGNORANCE OF THE LAW IS NOT AN ACCEPTABLE EXCUSE!**

Now, what is Holy Law, exactly? Since I had better know it. . .

Holy Law is actually the first five books of the Bible, Genesis, Exodus, Leviticus, Numbers and Deuteronomy. It is what is known as the Torah to the Jewish people, the Pentateuch to the Hallelujah Halfwits. It has been translated into every language on the planet, so ignorance will be no excuse at Judgment.

Holy Law can be broken down into three categories, essentially. One full third of the Law is the instructions to govern the priesthood, which was given to the Levites, and they blew it. The Lord is against them. There is another full third of the Law that governs agriculture and animal husbandry, or the production of our food supply, and the last third of the Law is the prescription for proper morality -- how to treat others, settle disputes, manage inheritance, laws of commerce and trade, how to receive or deny strangers in the home or the homeland, tithes, offerings to maintain the temple, what and when to repent, the formula for proper atonement -- governance of societal behavior. Parents' responsibility toward children, children's responsibility toward parents, neighbors to neighbors, how to be a righteous judge, and so on and so forth . . .

For a major example -- if you (anybody) had been raised from birth by Holy Law, you would know that (TO THE MEN HERE:) if you have sex with any female, in the Eye of The Most High you have married her. Right then, one time only. Bang! Married. Now by Holy Law, you are responsible for her upkeep and well-being. For life. And by Holy Law, you may marry as many women as you can maintain in a righteous manner -- adequate food, shelter, clothing and comfort and support. The Law is also that when you take a second wife, the first wife is not to be diminished in any way, such as less food, less clothing, space in the house that was hers -- nothing less than she has been accustomed to having.

TO THE WOMEN HERE: The Law in regards to women in that situation: When a woman has sex with a man, she has married him. She is to remain faithful to that one man only until death. To have sexual relations with another man is considered adultery. That is a punishable offense under Holy Law. Wanna know how much, look it up. All of the sexual promiscuity is looked at and sorted out at Judgment upon death. Men will be held accountable for all the comfort and support of all the wives that they abandoned -- it's a big, big mess. So how many people, if they knew that, would be having premarital sex with all wild abandon? My Guess? Not very many . . . STDs would not be such a thing, now, would they . . .

That's just one example of things that to be the most effective that anyone can be with spiritual power and authority, which the skills we teach are, many have a lot of slough to clean up, a lot of ignorance to get smart about, and a waaayyyy better understanding of how things really work in the Planes. Knowledge builds virtue, and virtue is the ability to have enough power to effect any desired outcome, or be up to the task. Any task.

Now, understand me here. Chylon's method of teaching is guided discovery. She has told you that writing your copy of Holy Law is required to get started with her. She would expect you to do that and then apply it to improve yourself. She went to great lengths to get approval for this group to only be required to write the 613 laws as compiled by some Jew somewhere for a shortcut. It is at least an adequate introduction, but by no means complete. It will be enough, however, for this group to get some success. She had to get permission from the Anointed, who took the matter before The Veil, and permission to teach that way was granted only for the trade of Chylon's testimony at judgment against all the Levites who failed humanity, that you and everybody else didn't already know Holy Law. Complete with history of the bloodlines and the metaphysics involved in building the Ark of the Covenant. So just writing that list of 613 is a lot shorter than the requirement to write the whole first five books of the Bible, or the Torah. You can thank her for getting it shortened as much as possible and still teach righteous power and holy authority.

Okay. In summary, why Holy Law?

1. It is the standard throughout all Creation by which everyone is judged. If you know the Law and have determined that it is easier to work within it to stay out of trouble, your progress will be smoother, and your conscience and your innate consciousness will be clear to operate with confidence and knowing, not blundering and guessing, then having to account for a hot mess of your own creation.
2. If you are caught up in a quandary, you will always know what to do. What is the right thing that will keep you in good standing with the forces, powers, frequencies, momentums, authorities, etc., (a few of the orders of angels there)? It is laid out in Holy Law, and common sense will help you to overlay the Law into today's language, today's situations, today's problems. Holy Law does not change! Not one jot or tittle! So you'll always have that steady foundation that does have the answer to everything of what to do, how to be to get the blessings.
3. You will be able to stand confidently on your own two feet by using the guidelines of Holy Law. You will be able to pass it to the next generation in the same way that you learned, Law and skill and responsibility to maintain it so every generation can improve.
4. It is the fastest way to get spiritual skill, knowledge and power. It really is. My copy of the Pentateuch took me three months to write, and I wrote probably 15 to 18 hours a day, stopping only to eat a little, or get a few hours' sleep so I could get back to writing with a fresh mind. Compare that to the three years I spent looking for any other way to get out of writing my copy. I thought it would be boring drudgery, but I was wrong! It was interesting, fascinating even, when I was writing my own copy. I could actually feel myself getting smarter as I went along.
5. I know that Chylon spent 30 years and gathered over 30,000 books, reading all that to see if anywhere else someone else had a better, faster way, and all that just to prove there is no better, faster way. Period.
